

# Technology

## Client web-services

*Displaying information  
Requests/ResponDs triggering  
transactions creation  
Swift + Python + Flask*

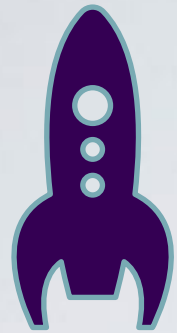

## Blockchain

*Security, transaction saving,  
users verification  
information communication  
Solidity, Truffle RPC*

## Arduino Uno

*C02, motion, light detectors,  
door-open & light directing,  
stand model*

Some features  
which we hope to implement in time!

IOS Mobile Application

Gas, Light, Water, Electricity taxes payment system  
using ERC20 tokens

AI “helper” to cut down energy spending
